SO
HO Network
Solutions Inc.

WELCOME!

Crime rarely leaves behind obvious clues, making it easy to miss and often hard to prosecute. That's how the idea of SOHO Network Solutions, Inc. was born. Our goal is to provide high quality forensics & identification supplies to customers worldwide.

Our journey has been filled with exciting moments and many learning experiences. We are sure you will be extremely satisfied with the group of product lines we have included in our portfolio and with the service we provide to our customers.

This catalog highlights our supplier's main areas of specialization to give you a broad idea of the range of products and services we supply.

We are always interested in feedback, so if you have questions, comments, requests for new products, suggestions for our catalog or website, or just want to get in touch, please email us at info@sohoteam.com.

On behalf of the entire SOHO team, I want to thank our customers and our suppliers for your unconditional support. We look forward to working with you for years to come!

Sincerely,

Helga Langthon, Vice President
SOHO Network Solutions, Inc.

ABOUT SOHO

SOHO Network Solutions, Inc. is a Jacksonville, Florida based import/export company specializing in the Forensics and Identification industry. We provide high-level expertise in international business development, channel development, distribution strategies and marketing.

Today SOHO's distribution network reaches a total of more than 35 countries in Europe, Latin America, Africa, Middle East, South East Asia and Australasia making us one of the largest exporters in the industry.

In fact, SOHO has been awarded the District, State, and Regional Small Business Exporter of the Year for 2009 by the Small Business Administration (SBA), Top Minority-Owned business by the Jacksonville Business Journal since 2010. 2011 Exporter of the Year in the Safety & Security Industry Category from ThinkGlobal Inc., publisher of Commercial News USA, the official export promotion magazine of the U.S. Department of Commerce and 2013 Top Women-Owned Business by the Jacksonville Business Journal.

LYNN PEAVEY COMPANY

Featured products	Crime Scene Investigation	Listening to you for new ideas
	<p>Lynn Peavey Company has over 800 evidence collection related items, and is the leading law enforcement supply company in the world. Their product line is used by Local, State, Federal and International law enforcement.</p> <p>Signature products include Hot Shot, Zipr-Weld Evidence Tape, IntegriSwabs, Microblue ALS, QuickCheck Narcotic test kits and MuscleWrap UV Tape.</p>  <p>LYNN PEAVEY COMPANY</p>	<ul style="list-style-type: none">• HISTORY <p>Lynn Peavey has spent the last 30+ years working with law enforcement and crime scene investigators to create products that make their jobs easier. After all this time they are still listening and working to supply new and improved product lines.</p> <ul style="list-style-type: none">• INNOVATION <p>Known for their passion for CSI innovation, Lynn Peavey insists that some of their best ideas have come from you, the consumer! Whether it is product modification or a brand new idea, they are always looking to the people who matter most.</p>

FIELD KITS

No matter what crime scene you encounter, Lynn Peavey has a convenient and portable kit packed with useful products to help you process efficiently. Kits include the Ultimate CSI Kit, Photo Documentation Kit, a variety of fingerprinting kits, the Evidence Packaging Kit, and much, much more.

A. Ultimate CSI Kit ^{GSA}

B. Photo Documentation Kit ^{GSA}

C. Craft Bag Evidence Kit ^{GSA}

LATENT FINGERPRINT DEVELOPMENT & LIFTING

Lynn Peavey carries a large variety of fingerprint powders, tapes, brushes and other tools to help you efficiently develop and lift fingerprints.

They also provide chemical enhancement and development supplies such as the Hot Shot Fingerprint Developer.

IMPRESSION EVIDENCE

Retrieve impression evidence from shoes to tires with a wide range of impression supplies.

EVIDENCE PACKAGING

Safely store, protect and collect evidence with evidence bags, envelopes, boxes, tape, etc.

ALTERNATE LIGHT SOURCES

Lynn Peavey carries alternate light sources to assist in finding otherwise hard to see evidence.

FINGERPRINT SUPPLIES

Several products are offered to easily capture clear prints.

TRITECH FORENSICS

Featured products	<i>Crime Scene Investigation</i>
	<p>Since 1983, Tritech Forensics has been committed to providing state-of-the-art forensic kits and products at affordable prices.</p> <p>It is their goal, through research and development, to continue to develop superior products to aid in all aspects of crime scene investigation and crime laboratory analysis. As the most experienced manufacturer, they are leaders in the field and set high standards.</p>

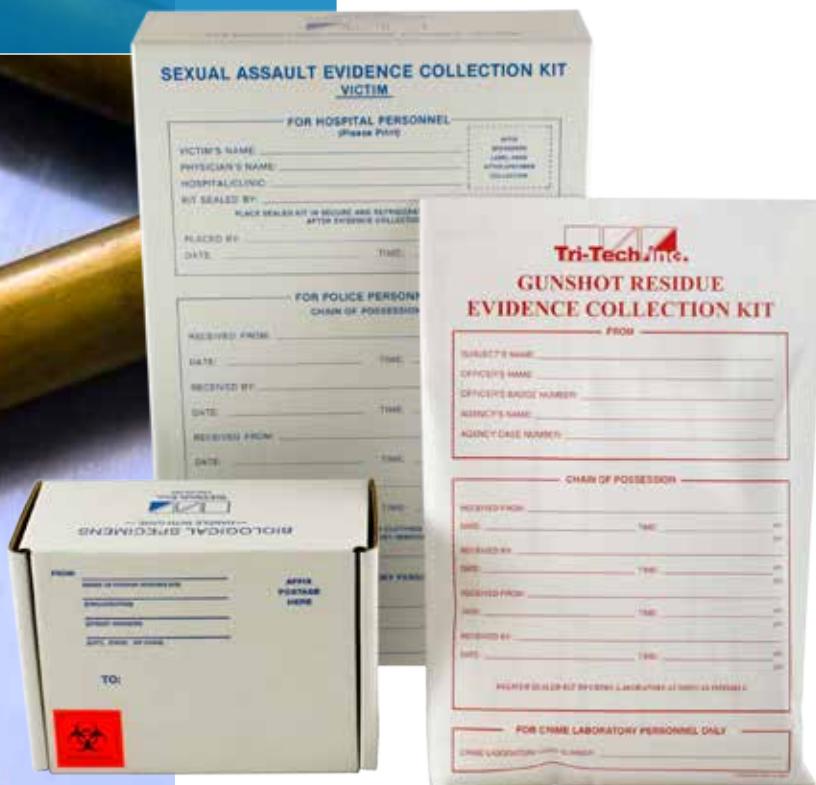

Evidence Collection Kits

- **#1 IN EFFICIENCY**

In criminal cases, evidence must be obtained promptly and thoroughly to be admissible in court. Collection Kits designed and manufactured by TriTech Forensics provide the most efficient means to obtain and preserve this valuable evidence.

- **EASY TO USE**

TriTech Forensics has produced several kits, designed with the distinct needs of the victim, medical staff, investigating officers, and crime laboratory personnel in mind. Collection Kits are organized in a step-by-step manner, and all of the components needed for each step are provided in separate envelopes.

 **TRITECH FORENSICS**

LATENT PRINT COLLECTION

A large variety of products, supplies, and kits to assist in latent fingerprint collection. Products include Latent Print Powders, Fluorescent Latent Print Powders, Magnetic Latent Print Powders, Wands, Brushes, Dusters, Lifting Tapes, Baking Cards, Fuming Chambers, Kits, and more...

THEFT DETECTION

TriTech offers several products and kits to assist in theft detection.

Products include both visible and invisible thief detection powders and pastes, invisible thief detection spray, invisible coin and metal lacquer, invisible fluorescent crayons and pens, and thief detection kits.

A. Invisible Thief Detection Spray

B. Invisible Detection Marker

C. Super-Invisible Thief Detection Powder with brushes and UV lamp

EVIDENCE CASTING

Casting kits and supplies for detailed and accurate casts of impression evidence.

FINGERPRINTING

Fingerprinting products include pads, inkless systems, rollers, ink, printing stations and more.

FORENSIC KITS

Kits for the collection of sexual assault evidence, DNA, gunshot residue, and much more.

PERSONAL PROTECTION

Personal protection products to keep law enforcement safe in hazardous situations.

360° CSD SYSTEM

A Complete Crime Scene Documentation System

A robotic camera system to capture full high-resolution spherical images with HDR (High Dynamic Range) capability. It uses a professional digital SLR camera and a precision-aligned fisheye lens.

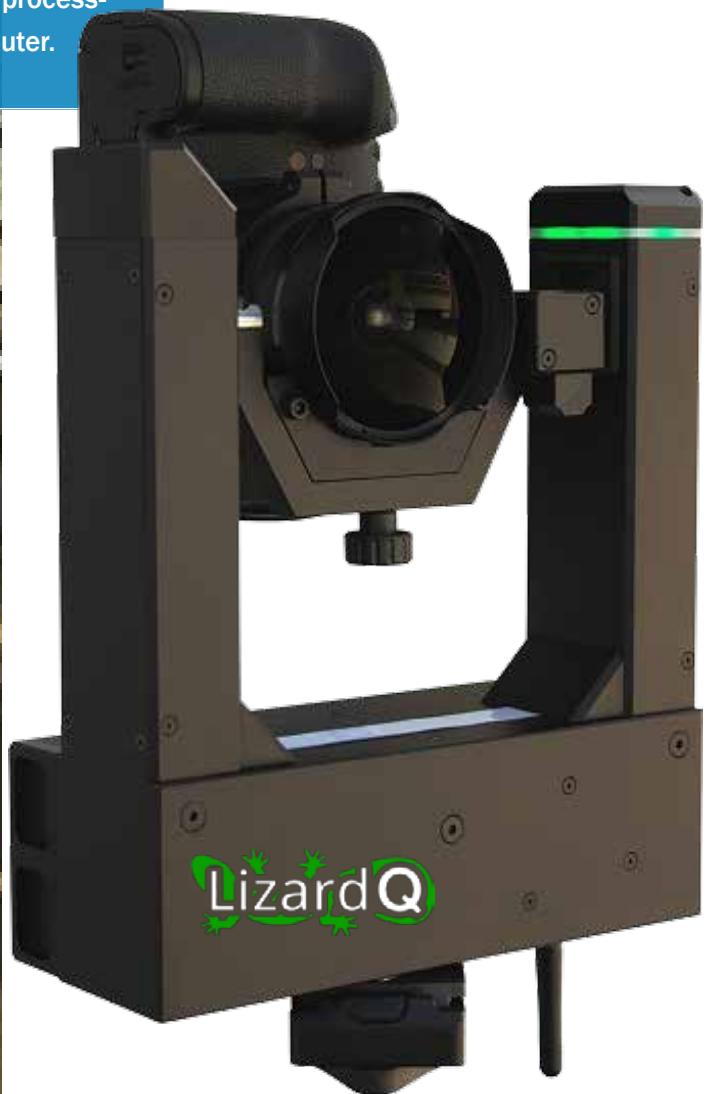

The full spherical image is assembled automatic from individual shots using specialized processing software on a computer.

- **IT CAN BE OPERATED VIA THE REMOTE CONTROL.**

For spherical image capture, the system is positioned automatically in several different directions by the robotic arm.

- **EASY TO USE**

- Fully automatic operation at the push of a single button.
- Automatic drag & drop image processing software for Mac OS X and Window.

Visual Asset Management Software (VAM)...

Database-driven application fully interactive that allows the user to return to the scene days, months or years after.

- Allows for data sharing among all the experts from multiple disciplines in live time, to be able to present a concise analysis of their findings .
- Allows the user to create and link hotspots to each other as well as maps/plans/sketches with directionality to create a high resolution virtual tour of the scene.
- Easy to use - Software with intuitive interface reduces the need for lengthy training or the need for high technical knowledge by simple “drag and drop” options to add any digital asset into the project (i.e HDR images, photos, videos, witness testimonies, 911 calls, sketches, etc)

CARRYING CASE

Transport equipment from site to site in these storage cases. They have hard shells for added protection.

FULLY AUTOMATIC OPERATION

At the push of a single button

REMOTE CONTROL

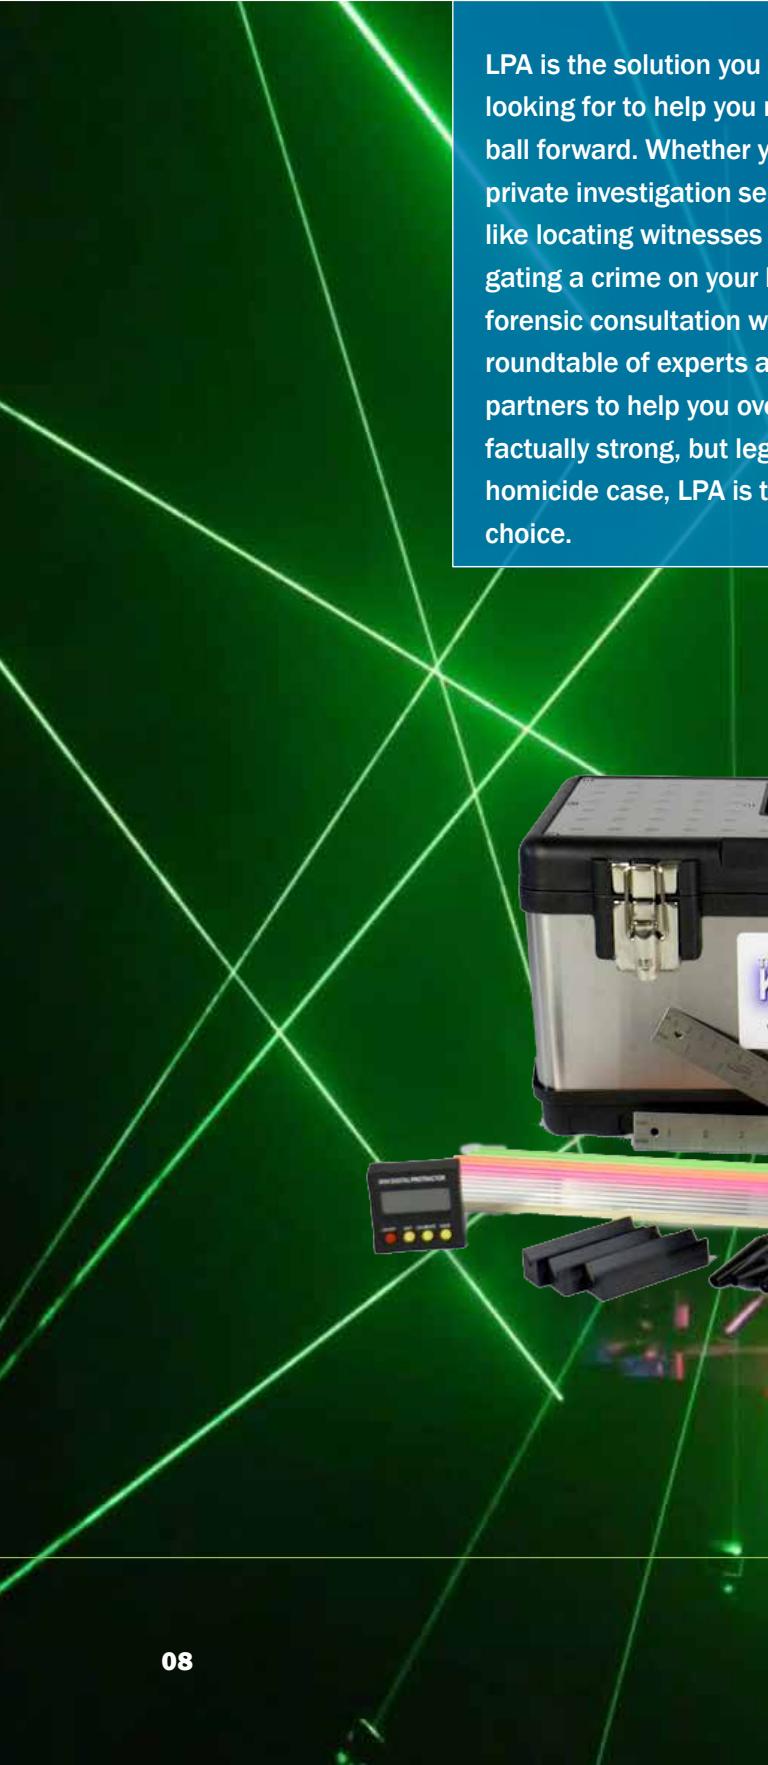

Wireless remote control device included.

AUTOMATIC DRAG & DROP

Image processing software for Mac OS X and Window

LAURA PETTLER & ASSOCIATES

Featured products	<i>Crime Scene Investigation</i>	
	<p>LPA is the solution you have been looking for to help you move the ball forward. Whether you need private investigation services like locating witnesses or investigating a crime on your behalf to forensic consultation where our roundtable of experts are your partners to help you overcome the factually strong, but legally weak homicide case, LPA is the right choice.</p>  <p>The image shows a collection of forensic investigation tools. In the center is a black and silver metal toolbox with a handle and two latches. A white label on the front reads "The Kaleidoscope System" with a colorful logo and the website "www.thekaleidoscopesystem.com". To the left of the toolbox is a small digital scale with a black display screen and a keypad. Next to it is a digital ruler with a yellow handle. Behind the ruler is a roll of yellow evidence tape. To the right of the toolbox is a spray bottle with a black cap and a pink label that says "Fantasy FX" and "Professional Hair". Below the toolbox are several pieces of evidence, including a black evidence marker, a clear evidence marker, a pair of black gloves, and a set of black evidence markers. There are also some small white evidence markers and a pair of black scissors.</p>	<ul style="list-style-type: none">• THE FUSION Fuses together the traditional shooting reconstruction solid dowel system found in the Spartan with Carolina Forensics' standard Tubular Dowel Bullet Trajectory Reconstruction System™ and doubles up on the number of lasers that come with the Spartan.

THE CLARION

Is the top of line in bullet trajectory reconstruction. The Clarion™ offers twice the laser light by joining the Fusion™ kit with the six additional 36"x.25" Tubular Dowel Rods and six extra lasers/accessories. The Clarion™ is the choice for vehicle reconstruction and is capable of reconstructing up to 18 bullet trajectories: 12 of those reconstructed with lasers.

GREEN, RED, AND BLUE FLATLINE LASER PACK

VERVE TOOLBOX

THE SPARTAN

The Spartan™ is an economically friendly bullet trajectory kit that offers the most quantity and highest quality products on market today! The Spartan is a basic trajectory kit ideal for long and short range forward projection and back extrapolation bullet trajectory reconstruction in various substrates including drywall, automobiles, forensic mannequins, Styrofoam heads, etc.

SciAps

Featured products	Drug & Explosive Investigation
	<p>SciAps is the pioneer and global leader in small footprint and Raman spectrometers. With experience at manufacturing modular systems, SciAps has developed a powerful series of Raman microscopes and the ReporteR, the first palm-sized material identification system. SciAps products are widely used in pharmaceutical, chemical research, material science, forensics, and other applications.</p>

Identify illicit narcotics in seconds

- **REPORTER**

Testing of suspicious drugs by crime labs can take up to several weeks. The palm-sized ReporteR, weighing less than 11oz, can rapidly identify illicit narcotics in seconds. When the result of the test indicates an illegal substance, criminal charges can be filed.

- **THE DIFFERENCE**

Unlike chemical pouch and swab kits, this is a simple and non-destructive test that can be performed on less than 100mg of sample. This allows the officer to preserve the evidence for confirmatory testing for trial procedures. Field data is saved in a simple report format.

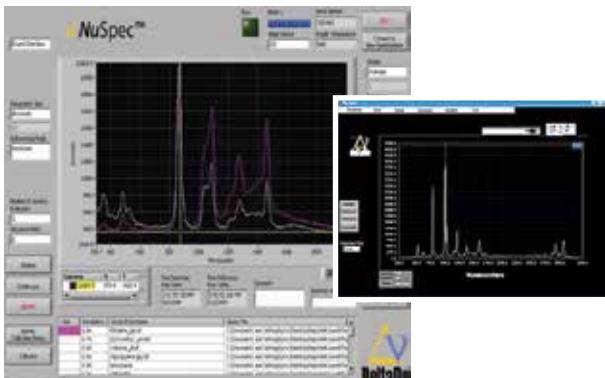

SciAps  

Inspector 500

The “500” class of Raman analyzers is equipped with higher wavelength Raman excitation (1030 nm laser) for the specialized case of testing samples that exhibit high fluorescence. For example, samples consisting of complex molecules or samples with a number of impurities are excellent candidates for the Inspector 500 (1030 nm laser). As with the rest of the SciAps Agent series of Raman analyzers, the Inspector 500 offers high stability, the same intuitive software and interface, fast processing speed, and seamless report generation and data management. spectral library, with results presented on a highly visible display.

SciAps SOFTWARE

SciAps software allows users to acquire, save, archive and interpret spectral data. Data may be continuously acquired and automatically saved as ASCII xy or spc format.

All spectra are referenced with the laser off to subtract ambient light. The spectral viewer allows users to interpret the most recently acquired spectrum. Spectra may be zoomed or expanded and peak heights and frequencies are reported on the screen.

BENCH-TOP RAMAN SPECTROMETERS

Advantage Series is DeltaNu's line of classic low cost and high performance bench top models.

PORTABLE/HANDHELD RAMAN SPECTROMETERS

The Inspector Raman™ is portable and used for analysis of solids, liquids, pastes, etc.

RAMAN MICROSCOPES

Raman microscopy is way to characterize your samples and accurately identify chemicals.

STAND-OFF RAMAN

Handheld, medium range stand-off Raman system for material identification.

INDEPENDENT FORENSICS

Featured products

Serology

Independent Forensics (IFI)
DNA Testing and Technologies
develops new products and
services for crime laboratories,
medical genetics and human
identification. IFI's research
and development produces new
products for law enforcement.

IFI's innovation in forensic R&D
has been recognized by research
contracts, prestigious awards,
and multiple accreditations.

DNA Testing

- **RSID™**

The Rapid Stain Identification Series (RSID™) is designed for fast, easy and reliable detection of human fluids from a variety of samples encountered by forensic laboratories. Detection protocol is completely integrated into standard laboratory procedures for DNA analysis.

- **SPERM HY-LITER™**

The SPERM HY-LITER™ eliminates the problem of identifying sperm in sexual assault evidence, and can be used with automated microscopic screening systems and for the identification and selection of sperm using Laser Capture Microdissection.

 **Independent
Forensics**
DNA TESTING & TECHNOLOGIES

RSID™-FIELD KITS

The new Rapid Stain Identification Field Kit (RSID™ Field Kit) comes in 3 different versions designed for fast, easy, and reliable detection of human blood, semen, and saliva from evidence encountered in the field.

All materials needed to perform the stain analysis as well as to document and transport the results are included in each kit. RSID™ Field Kit results correlate with the ability to obtain DNA data.

SPERM HY-LITER™

The Sperm HY-LITER system is a complete fluorescent staining kit for sexual assault evidence. Benefits are positive identification of sperm, microscopic screening of sperm, human specific, debris does not interfere, meets new audit standards for preservation, and they glow-scan at 40x.

AMPLICON RX™

Amplicon Rx™ has been designed specifically for post-PCR recovery of STR amplicons from forensic DNA multiplex PCR reactions. The kit will preferentially bind and elute PCR amplicons from a mixture of amplified DNA and unincorporated oligonucleotide primers.

EQUIPMENT

McCrone has SPERM HY-LITER™ microscope packages specifically designed for forensic DNA laboratories that not only want a faster, confirmatory technique for sperm detection, but also want to document their findings.

There are options available from manual systems to fully automated 8-slide scanning systems, image capture, & report generation.

REGULA

Featured products

Optical Enhancement

Regula Baltija Ltd., a scientific and industrial enterprise situated in Daugavpils, Latvia. Regula has become a leading developer and producer of hi-tech forensic equipment and software for authentication of security papers, IDs, passports etc.

Regula prides itself of providing quality services and aims at exploring new markets and developing quality products.

Take a closer look...

- **PRODUCTS**

Regula offers several high quality devices, magnifiers and equipment to assist in document authentication. Each product is designed with the needs and comfort of the end user in mind.

- **SOFTWARE**

In addition, Regula also provides a variety of software to use in conjunction with their product line. These programs allow users to retrieve information, and capture, process, compare, and archive images.

VIEWING MAGNIFIERS

Regula USA provides high quality, easy to use viewing magnifiers to ensure document authenticity, and examine fingerprints, and small objects. Magnifiers are sharp, bright, and distortion free.

A. *Compact Magnifier

B. *Compact Magnifier with light

C. Forensic Magnifier

D. *Dactyloscopic Magnifier

E. *Dactyloscopic Magnifier

*Comes with measuring ring(s) or the option of measuring ring(s)

COMPACT DEVICES

Compact Devices enable you to detect signs of printing security features, examine documents in UV light, visualize anti-strokes and reflective (3M) protection, compare sizes, and examine documents in transmitted light.

*All compact devices come with the option of measuring rings and a leather carrying case.

DOCUMENT EXAMINATION

Equipment for examination of security papers that include protection features.

SPECTRAL VIDEO MAGNIFIERS

Spectral video magnifiers for the expert level examination of security protected documents.

DOCUMENT READERS

Readers with the ability to scan, read, retrieve, verify documents with security features, & more.

SOFTWARE

Software programs allow users to retrieve information, capture, process, compare, and archive.

DAZOR

Featured products	<i>Optical Enhancement</i>
	<p>The name DAZOR has been synonymous with quality task lights and magnifiers for almost 70 years. Dazor manufactures a variety of lighting and magnifying solutions perfect for use in the field of forensics.</p> <p>From circline magnifiers, to loupe lamps, to the evolutionary speckFINDER video microscope, Dazor is sure to provide lighting to meet all of your needs.</p>

The speckFINDER HD®

- **WHAT IS IT?**

The speckFINDER HD® is a visual imaging system used by people who need to see precise details of the objects they work with, and demand an alternative to limited functionality of common workstation microscopes and stereoscopes.

- **ADVANTAGES**

In order to improve the examination and processing of evidence to better solve crimes, Forensic Labs can study precise details in high definition magnification. Save and process images for safe and effective evidence handling and storage.

speckFINDER HD®
High Definition Magnification

speckFINDER® ELECTRONIC VIDEO MICROSCOPE

The speckFINDER's ergonomic, customer driven design is lab tested and approved, letting you increase productivity while also decreasing the physical discomfort reported by up to 80% of microscopists. It's perfect for presentations, with video outputs compatible with computers, projectors and TVs.

Features

- Ergonomic and easy to use
- Compact design
- Flat panel display
- Windows XP operating system
- 3 USB outputs / Video output

PROFESSIONAL LOUPE LAMPS

Dazor's line of professional loupe lamps include both table top and handheld models. All lamps are fitted with optical grade lenses and lighting to insure the most crisp and clear magnification.

A. Professional Loupe Lamp—Round

B. Handheld Loupe Lamp—Battery powered

C. Handheld Loupe Lamp

SMART LED RING LIGHT FOR MICROSCOPES

The Smart LED Ring Light can be used with the speckFINDER.

HI-LIGHTING MAGNIFIERS

Hi-Lighting magnifying lights are perfect for the precise inspection of an object's surface.

CIRCLINE MAGNIFIERS

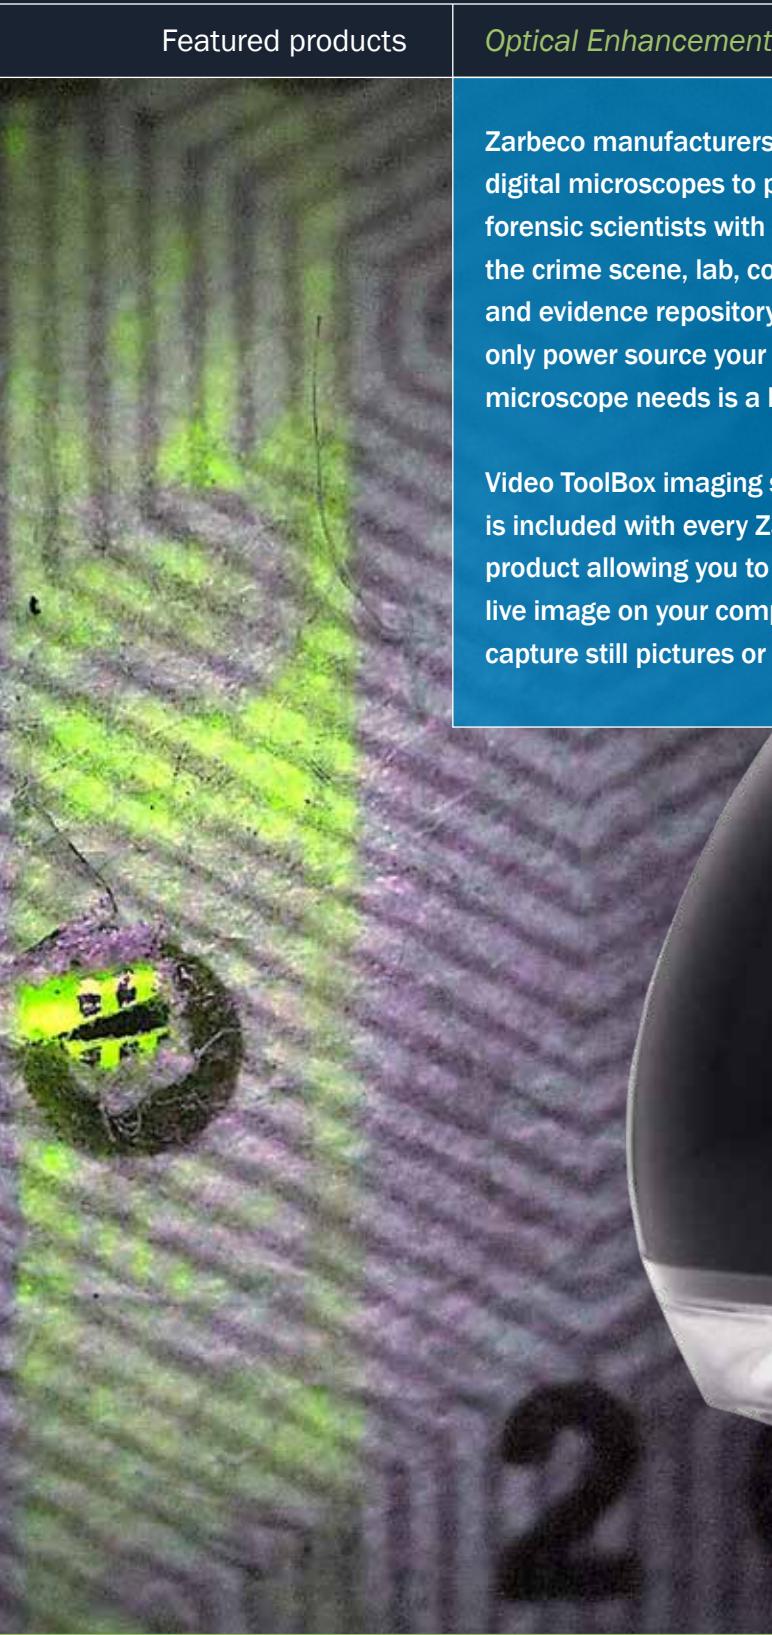

The circline magnifiers provide even, shadow-free light for hands-free, detailed work.

LED FIXTURES—BENCH BEAM

LED Lights use light emitting diodes to produce a pure white light for color sensitive jobs.

ZARBECO

Featured products	<i>Optical Enhancement</i>
	<p>Zarbco manufacturers portable, digital microscopes to provide forensic scientists with tools for the crime scene, lab, courtroom, and evidence repository. The only power source your digital microscope needs is a laptop.</p> <p>Video ToolBox imaging software is included with every Zarbeco product allowing you to view the live image on your computer and capture still pictures or movies.</p>

Zarbco's forensic favorite

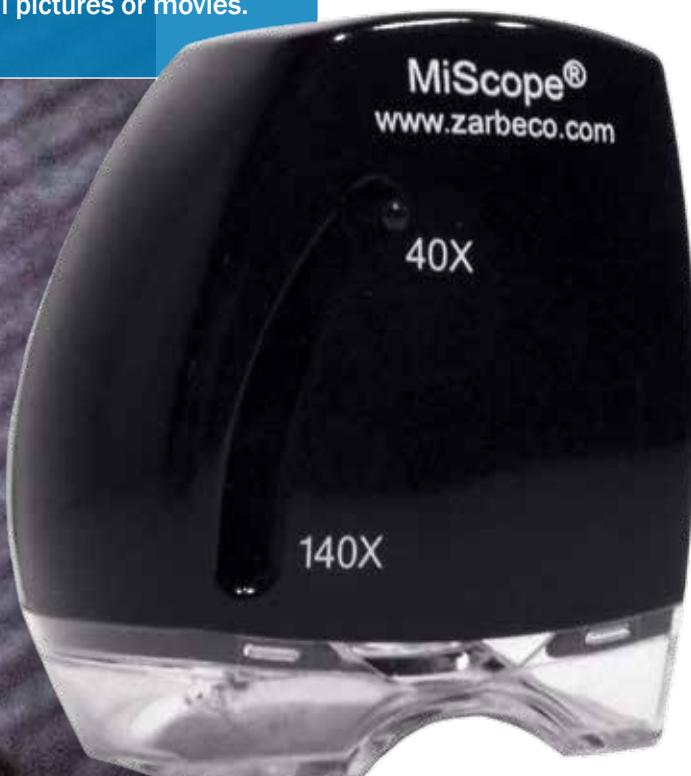

- **MISCOPE**

The MiScope comes complete with IR and UV lights for Questioned Documents, Fingerprints, Courtroom Presentation, Crime Scene Examination, Forensic Anthropology, Evidence and more. Used by forensic scientists worldwide.

- **TESTIMONIAL**

"Never again will I have to drag my heavy microscope to an attorney's office when the opposing side won't let me have the original document for examination in my office. Actually the MiScope will totally replace my old faithful microscope."

—BD

MISCOPE

The MiScope combines a digital movie camera, precision optics and LED lighting in a single microscope that fits in the palm of your hand.

The MiScope has 40–140X magnification which lets you zoom in on the fine details of insects, textiles, electronics, etc.

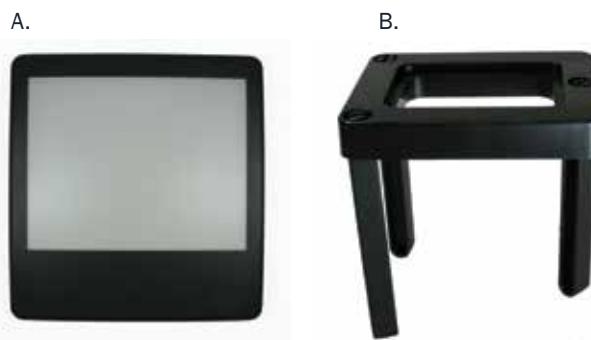

MISCOPE ACCESSORIES

Zarbeco offers several accessories to be used with the MiScope including a portable stand, filters, LED flashlight, safety eyeware, portable light table, and a kit that includes many of these accessories in one package.

A. Light Table

B. MiScope Adapter Lens with Stand

DIGITAL MICROSCOPES

Portable digital microscopes give forensic scientists the tools they need to use anywhere.

MICROSCOPE ACCESSORIES

A variety of handy accessories are available to use with Zarbeco Digital Microscopes.

DIGITAL CAMERAS

Several scientific quality digital cameras are designed for use in microscopy, security, photo ID systems, and much more.

SOFTWARE

Zarbeco provides software for many different uses such as Video ToolBox, FocusLock, Video Averager, and MAC Software.

X-Loupe Agilelite System

Featured products	<i>Powerful and Flexible illumination System</i>
	<p>Lumos Technology Co. Ltd. (Lumos) was founded in 2004, was initially focused on the development of digital optical and image processing equipment "X-Loupe Portable Microscope Camera" series, it helps users to see extremely tiny details but the naked eyes are unable to see.</p> <p>It enhances the ability of products in research & development, design & manufacturing, inspection, quality control, assembly and precision observation.</p>

- **WHAT IS A X-LOUPE AGILELITE SYSTEM?**

This system is the powerful and flexible illumination system containing the ultra-violet, visible and infrared of light. Mounted on the front end of camera lens barrel, it's suitable for the following fields, such as criminal identification, Non-destructive testing, even to biotechnology research and cancer detection. Custom wavelengths are available for meeting the needs of special excitation light in all professional fields.

**Substitute the function of flashlights;
Enhance forensic light source;
Successfully lower equipment costs
but get same effect, even better.**

Full integration with DSLR

Collecting all the images from the scene, what you see is what you get.

Free investigator's hand

It's not only for one hand operating, but also for a convenient carry in quick crime scene searches.

Ease of use

Easy to learn, easy to use, easy for you to experience all new concept of quality photography.

Flexible and optional

Whatever professional or new users by use of the expandable mission packs to get consistent results.

The Control unit.

For Lighting set-up (includes Light Channel, Dimming Intensity, Status Display) and Battery chamber.

AngeLight Ring

Two custom/selected light sources by way of inner and outer rings are switchable; each ring equips 16 High Output Cree® LED.

4x4 Barrel

White light and Blue/Green light sources by way of inner and outer rings are switchable; each ring equips 16 High Output Cree® LED.

CONSOLITE FORENSICS

Featured products	Optical Enhancement
	<p><i>Optical Enhancement</i></p> <p>Consolite Forensics is an innovative new company established to exploit new technologies in the world of forensic science. Consolite Forensics has already brought to market two revolutionary new products that are transforming their respective fields.</p>

CERA LT

- **PROBLEM**

Cylindrical objects often pose a challenge when it comes to fingerprint extraction. The curved surface does not lend itself well for photography and subsequent images are often very difficult to piece together to reveal a complete print.

- **SOLUTION: CERA LT**

The CERA LT is a state of the art optical system capable of enhancing and capturing even the most difficult prints from curved surfaces e.g. cartridge casings, cigarettes, syringes, lipsticks etc. The dedicated software then allows for images to be stitched with much greater precision than original methods, offering a far clearer, complete print.

CONSOLITE
FORENSICSTM

HPS

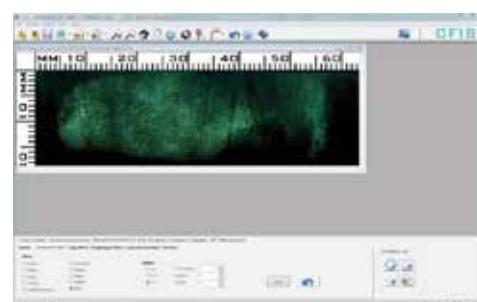

Thermal paper is increasingly used worldwide for applications such as till receipts, ATM printouts and boarding passes. Often recovered from crime scenes, thermal paper is usually not simple or quick to process without the use of chemicals.

The HPS is a revolutionary new patented system to automatically and consistently develop fingerprints on thermal paper in minutes, without the use of chemicals.

The system works using thermal technology along with a unique optical detection system to ensure a fully controlled automated development method that doesn't turn the paper black.

Evidence on Small Cylindrical Objects.

Consolite Forensics Imaging Software (CFIS)

DACTYPRINT

Featured products

Fingerprinting

DactyPrint provides high quality, durable fingerprint pads for all of your fingerprint needs. From Law Enforcement Agencies to financial institutions, a clear fingerprint taken with a DactyPrint pad can help you save time and money.

For a permanent, non-smearing print, lightly place your finger on the surface of the pad then touch the paper. Excess ink is removed by rubbing the fingers together.

So what's the difference?

- **THERMOPLASTIC PADS**

Smooth thermoplastic surface produces ridge definition and quality comparable to any inked system. Ideal for recording fingerprints on checks, notary prints in log books, police citations, etc.

- **CERAMIC PADS**

Hard, durable ceramic surface applies the perfect amount of ink that produces permanent, clear, non-smearing prints ideal for booking stations, national id's, passports, voter registration, etc.

dacty
print

SMALL ROUND 1 1/2" PAD—DP-10C, DP-10P

DactyPrint's most compact pad doesn't compromise quality for size. Available in both Ceramic and Thermoplastic models.

2" ROUND PAD—DP-25-P

Small and convenient thermoplastic pad perfect for day to day, quality fingerprinting.

SMALL 2 1/4" x 1 3/4" PAD—DP-15C, DP-15P

Small rectangular fingerprint pads for general fingerprinting
Pads available in both Ceramic and Thermoplastic models.

5" x 3" PAD—DP-35P

Large Thermoplastic pad featuring a flat, sleek design and a generous inked area to suit all your fingerprinting needs.

2 1/2" ROUND PAD—DP-20C

Mid-sized round pad with a hard ceramic surface. Produces dark, crisp fingerprints.

INKLESS SYSTEM—DP-LSKIT

Inkless pads and coated labels work together to provide instant, dark prints.

OUR BEST SELLER!

LARGE 5 x 3 1/2" PAD—DP-40C, DP-40P

DactyPrint's largest, and #1 selling fingerprint pad gives you with the space you want and the quality you need. This pad delivers the most prints per pad and is available in both Ceramic and Thermoplastic models.

BVDA

Featured products	Fingerprinting	
	<p>BVDA is a fully integrated forensic manufacturing company that develops, fabricates and markets advanced forensic products. The company has grown since 1934 by diversifying its product lines and through increased research and development.</p> <p>BVDA's objective is to produce advanced and cost effective products enabling customers to reach high levels of performance.</p>  	<p>Multi-use Gellifters®</p> <ul style="list-style-type: none">• RISK-FREE LIFTING <p>Gellifters® make it possible to lift the same print multiple times without the risk of destroying it. Also, there is minimal or no risk of damaging the surface.</p> <ul style="list-style-type: none">• ONE PRODUCT, MANY APPLICATIONS <p>Lift powdered fingerprints, untreated fingerprints, fingerprints developed with cyanoacrylate, fingerprints in or on latex and vinyl gloves, shoe impressions in dust, traces in blood, dye-stained prints and shoe prints in blood, ear prints, indented writing, micro traces and fibers.</p>

GELLIFTERS

Gelatin lifters have been used by crime scene officers for over a century and are still an indispensable tool in the field of crime scene investigation.

Gellifters® have a low tack and a certain flexibility that enable them to lift fingerprints and show impressions even from surfaces that are irregular and/or mechanically weak.

A.

B.

C.

INSTANT LIFTERS

The BVDA Instant Lifter® consists of a transparent adhesive film adhered to a black, white, or transparent backing. The adhesive film has a special low tack adhesive.

The protective cover is die-cut, for easy removal. To the adhesive film, a backing sheet is attached. This backing can be easily be applied to the adhesive film, after lifting the powdered fingerprints.

A. Instant Lifters—10x10 cm, White

B. Instant Lifters—5x10 cm, Transparent

C. Instant Lifters—5x5 cm, Black

5-MTN

5-Methylthioninhydrin (5-MTN) developed fingerprints have a stronger color than those developed with regular ninhydrin.

NIN-PRINT

NIN-PRINT, ninhydrin solution in a spray can (CFC-free, 250 ml). Does not contain acetic acid and evaporates very fast.

THERMANIN

ThermaNin is a ninhydrin derivative for developing prints on thermal paper.

SILMARK

Silmark silicone rubber casting compound can be used on textured surfaces.

PURITAN

Featured products

Evidence Collection

Puritan has been trusted for the highest quality, single use applicators and swabs, medical supplies, laboratory supplies, diagnostic DNA testing swabs and cleanroom products for nearly 100 years.

Their ever-expanding line uses the most current manufacturing processes to deliver innovative solutions for even the most demanding applications.

Did you know...

• NO DNA CONTAMINATION

Forensic professionals trust Puritan swabs for clean, accurate sampling. Puritan's collection of DNA-free and DNase/RNase-free sampling swabs have been tested by an independent lab. We purposely had this test done to the most stringent standards (less than 25 pg of human DNA).

• THE RESULT?

Certified to be DNA-free at a threshold lower than any other swab on the market today. Be even more confident!

CAP-SHURE® APPLICATOR

Cap-Shure® Applicator features an aerated tip protector which slides on the shaft, with the tip suspended away from sides.

Can lay flat to air dry. Designed for DNA and evidence collection. This applicator is sterile.

Details

Tip: Cotton

Shaft: Wood or Plastic

LARGE FOAM APPLICATOR

Buccal swab, high article collection capacity, large round tip for specimen collection for DNA testing and Luminol test of blood stains.

Details

Tip: Foam

Shaft: Polypropylene

WOUND MEASUREMENT DEVICE

Wound measurement for use in forensics and in evidence-collection applications.

Details

Tip: Foam

Shaft: Polystyrene

DNA-FREE COTTON SWABS

Use for Crime scene investigation, buccal cell collection and specimen collection. 6"

CUTICLE STICK

For evidence collection under the victims nails. 7" x 5/32"

TRANSPORT TUBE

Transport tube applicator with a sterile, protective, tube.

SELF-SATURATING SWAB

Trace DNA collection device. IPA fill, foam tip.

PRISM LIGHTING

Featured products	Portable Lights	The Prism Inflatable Light (PIL)
	<p>Prism Lighting Services, LLC was established in 2003 solely for the manufacturing, sales and marketing of the international patented Prism Inflatable Light.</p> <p>The Prism Inflatable Light is used to provide lighting without access to power inside of tents and outside of hazmat areas, outdoor crime scenes, rescue missions, and more in 3 easy steps.</p>	<ul style="list-style-type: none">• PROBLEM How can one person illuminate an area arching over 10,000 sq meters in 5 minutes, without access to power?• SOLUTION: THE PIL The PIL is characterized by a support structure in synthetic fabric and an air-inflated cylinder, which raises the light source up to 4.5 meters (15 ft) high and provides excellent illumination over the area. The structure can be easily made to function by one person, in complete darkness, in less than 3 minutes, making it possible to illuminate areas up to 10,000 sq meters (12000 sq yards).   <p>WWW.SOHOTEAM.COM</p>

PRISM INFLATABLE LIGHT

The Prism Inflatable Light is characterized by a supporting structure in synthetic fabric and an air-inflated cylinder, which raises the light source up to 15 ft high and provides excellent illumination over the area.

Features

- Easy to use by a single person in complete darkness
- Takes only 3 minutes to inflate
- Light weight, foldable & portable
- Cools & Deflates (fold back) easily in less than 5 minutes

Testimonial

"We work in coordination with the Orange County (Orlando, Florida) Fire Department and the Sheriff's Department so we purchased the Emergency Inflatable Light (EIL) because it has the portability we need to get to locations quickly and it takes only one person to set it up."

—Tom Sorley, Supervisor

Specs

Inflated: 15 feet

Illuminates areas up to 10,000 sq meters (12000 sq yards)

PIL NITELITE

The PIL NiteLite has many of the same advantages of the original PIL but is a smaller version which when inflated, stands 9 feet tall.

GENERATOR

Lightweight, quiet Honda generator provides 2000 watts (16.7 A) of Honda Inverter 120V AC Power.

FOXFURY

Featured products

Portable Lights

FoxFury Lighting Solutions creates unique and cutting edge lighting products that reflect the needs of our customers, who demand quality and dependability. FoxFury is best known for its niche LED headlamps designed for specific markets including Fire, Industrial, Hazardous Area, Law Enforcement, Forensics and Recreational.

- **LIGHT UP A SCENE IN SECONDS**

With the battery powered FoxFury Nomad® Prime Portable Scene Light.

With built-in tripod legs, the Prime extends up to 8ft (2.4m) tall to deliver up to 4,000 lumens.

- **CAN BE STRAPPED AROUND THE SHOULDER**

It sets up in seconds by deploying its built-in tripod legs, raising the telescoping pole and adjusting the light head. This light extends tall enough to clear people's heads, which minimizes shadows and accidental blinding.

to function by one person, in complete darkness, in less than 3 minutes, making it possible to illuminate areas up to 10,000 sq meters (12000 sq yards).

HAMMERHEAD H4A CSS FORENSIC LIGHT KIT

Portable forensic light source (alternate light source) kit features FoxFury 365nm, 395nm, 450nm and 470nm nm HammerHead forensic light sources (blue and UV). Each FLS flashlight features a waterproof and anti-roll design and is accurate within 5nm. Kit comes with a hard case and 3 forensic goggles (1 yellow and 2 orange). HammerHead lights run on three CR123 batteries (not included).

Blue Light

Used For: field crime scene search, laboratory, medicolegal (including SANE, coroners and medical examiners) and hotel room inspection.

Evidence Identified: trace evidence (hairs, fibers, etc.), gunshot residue and biological fluids including blood treated with fluorescein and footwear (other) impressions

UV Light

Used For: field crime scene search, laboratory, medicolegal (including SANE, coroners and medical examiners) hotel room inspection and specialized industrial applications.

Evidence Identified: serological fluids (including urine and semen), hairs and fibers

RUGO

The FoxFury Rugo is a rugged go anywhere lighting tool designed for photo / video use.

FORENSIC LASER SYSTEM

Compact forensic blue laser provides up to 2W of 445nm light for forensic searches up to 25 ft (8 m) away.

LABINO

Featured products	Portable Lights
	<p>Labino AB is one of the world's leading manufacturers of UV and White Light products as well as Alternative Light Sources.</p> <p>His mission is to develop lamps based on your needs, to help you create a safer world and to help you see when your eyes are just not enough.</p>

- **ONE OF THE MOST POWERFUL HANDHELD LAMPS ON THE MARKET!**

Labino SuperXenon 50 W UV lamp is based on MPXL technology and is one of the most powerful handheld UV lamps on the market! The 50 W Xenon bulbs generate an extremely high UV intensity, providing a very clear excitation of fluorescent material.

- **A LIGHT HANDHELD LAMP PRODUCING AN EXTREMELY HIGH INTENSITY**

Models are available in three important distinctions – floodlight, midnight or spotlight, each giving different beams and intensities. Each lamp obtains full power in 5-15 seconds and can be switched on and off whenever used, without pre-cooling. Available with a carrying case.

MAKES IT BRIGHT 

SUPERXENONLUMI KIT-Lumicyano

Lumikit™ is the new enhanced version of Lumicyano™. It has been especially designed to have a stronger brightness and to develop high level detailed fingerprints under optimal conditions. There is a minimized risk to “over-glue”, thus providing better results than classical super glue, post-treatment dyes or powders. The Lumicyano™ allows you to use your present fuming chamber – Just 1-Step “Fume + Dye” and light with SuperXenonLumi 325 nm Light!

FEATURES OF THE NEW GENERATION OF LUMICYANO™

- Stronger fluorescence brightness
- Extended fluorescence observation
- Shelf-life: 1 year
- No need to refrigerate
- Fumes and Dyes simultaneously
- Improves the image of latent prints
- High level details fingerprints better than classical super glue
- Compatible with dyes / powders and DNA analysis
- Works on hard materials
- Employs existing fuming chambers
- Reduces cost and time as no dying or cleaning up required

MIDBEAM 2.0 ZEUS

MidBeam 2.0 is an extremely robust hand held lamp especially designed for use by heavy industries with very difficult operating environments.

LABINO TORCH LIGHT UVG2

Is a small-sized, lightweight, UV-A LED torch designed for quick inspections in “hard-to-reach” spots. It is used within many different applications.

BEAR AIDE, INC

Featured products	Documentation
	<p>The Bear Aid product line includes high quality templates which are suitable for nearly every crime scene including specialized Police products like the Sniper Template and the Drug Recognition Card.</p> <p>All Bear-Aide products have been designed in conjunction with law enforcement professionals and have been field tested before being offered to and used by the law enforcement community.</p>

CRIME SCENE DO NOT CROSS

Advantages

- **CONVENIENCE**

Bear-Aide has you in mind when designing their templates. Notebook sized templates include holes to fit a three ring binder and smaller templates and sets come in a sturdy, black, leatherette carrying case.

Templates are designed for use with a pencil or a medium ball point pen. Certain templates also come complete with scale ruler, protractor, and a compass.

- **DURABILITY**

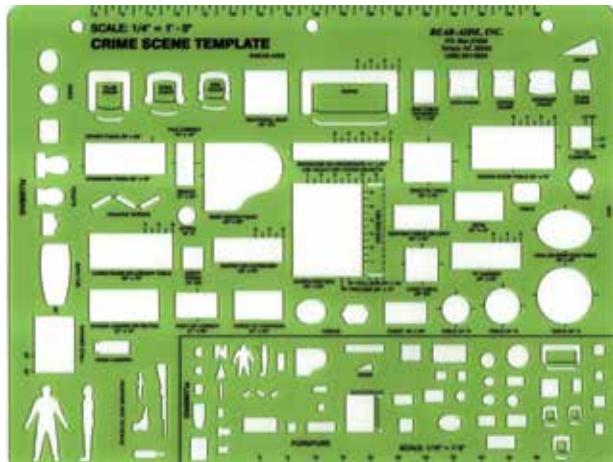

All Bear-Aide templates are machined in the USA from the finest material available. They are made for daily use in all kinds of situations and will be there for you at any crime scene. All templates are field tested.

CRIME SCENE TEMPLATE

This 8 ½x11" template includes furniture and plumbing cutouts in two convenient scales. The ¼ inch equals one foot scale produces detailed scale drawings when drawn with a medium ball point pen.

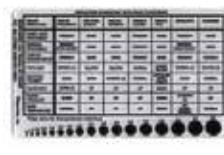

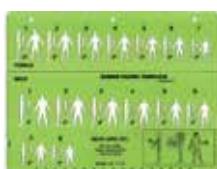

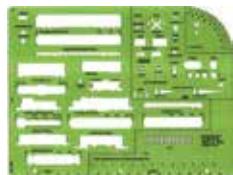

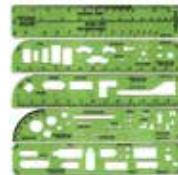

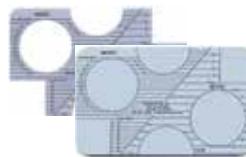

The template is useful for drawing burglary reports as well as more serious crime scenes, including arson. The 1 inch equals 10 ft scale can be used with the 10X traffic templates. Scale rulers for both scales are included.

TEMPLATE SETS

Bear Aide offers a variety of template sets which each come in a sturdy and durable black leatherette carrying case.

Sets include Universal Template Set, Pocket Traffic Set, Deluxe Pocket Set, Double Traffic Set, Forensics Photography Set, and more.

RAILROAD TEMPLATE

8 ½x11" template of railroad equipment to facilitate the drawing of accident scenes.

HUMAN FIGURE TEMPLATE

Template including male and female figures in a variety of heights in front and side view.

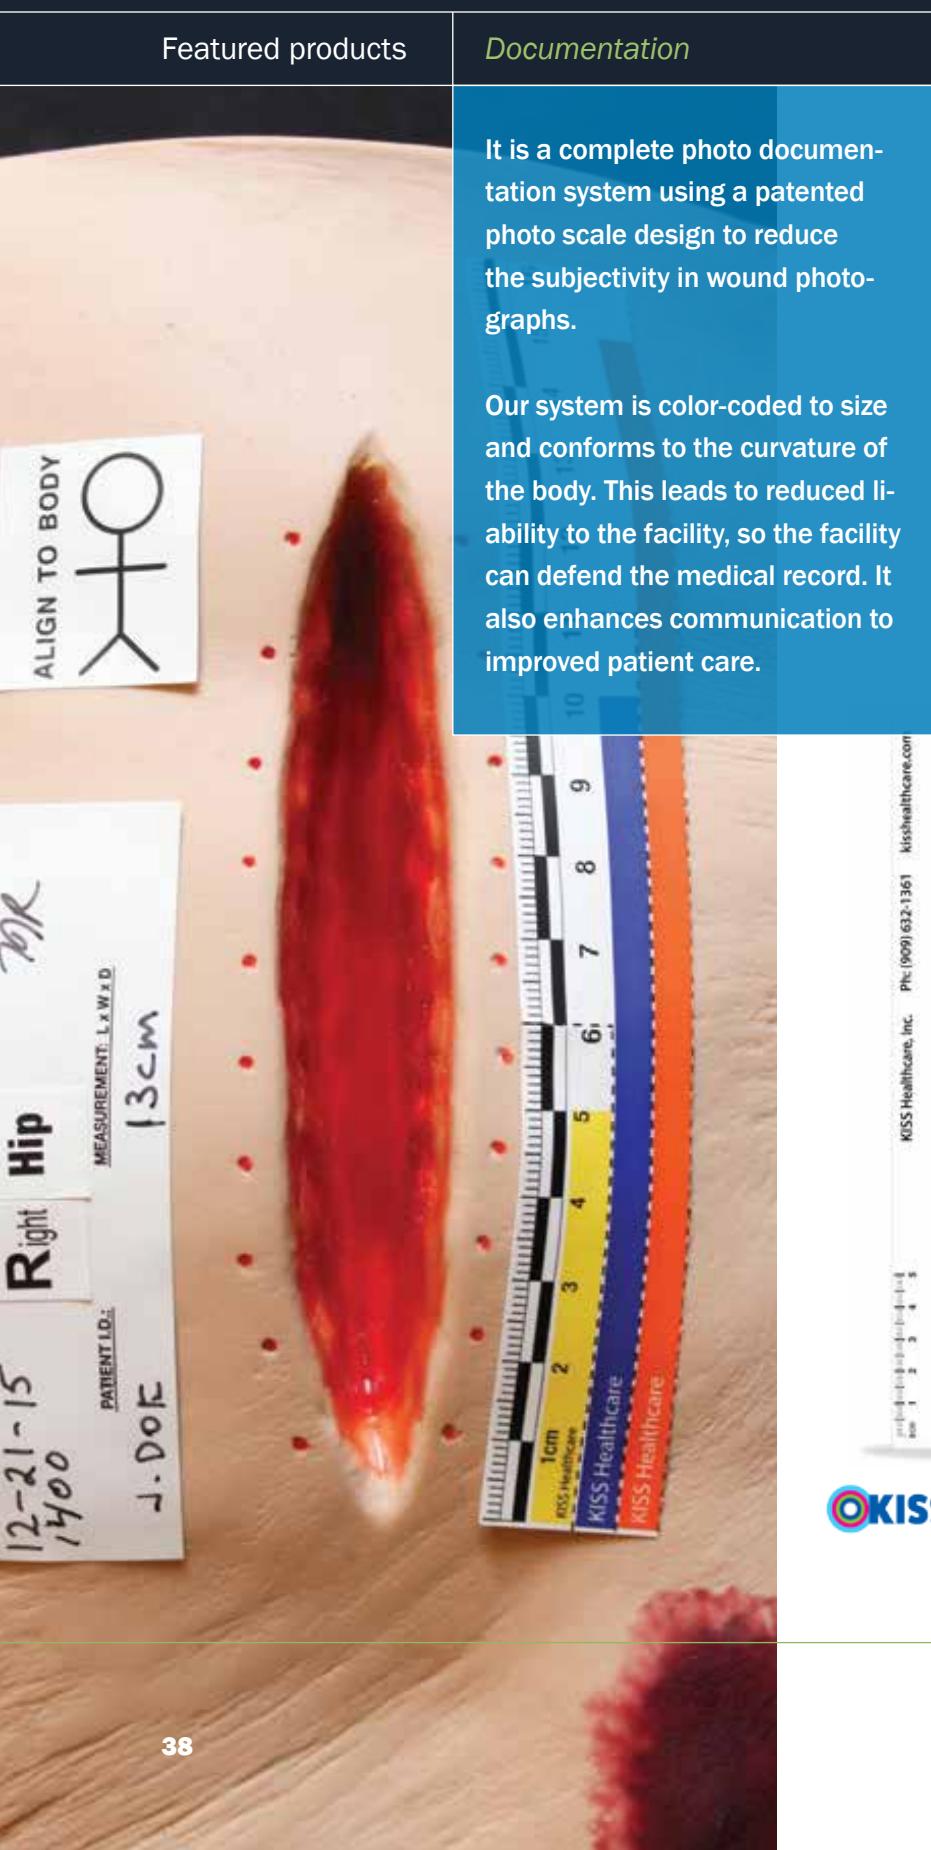

PLASTIC FORMULAE CARD

3x5" plastic card containing a large variety of formulae used in traffic accident reporting.

DRUG RECOGNITION CARD

Unique drug recognition and classification card for evaluation and classification.

THE KISS SYSTEM

Advantages

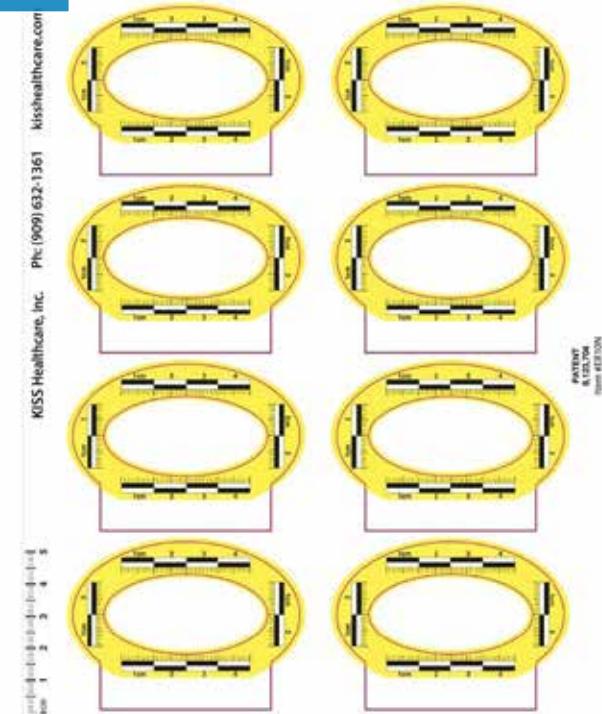

- **360 DEGREE SCALES**

Helps address the problem of camera positioning. It keeps the wound in perspective so you see what the wound looks like at the time of the assessment. Rulers and L-rulers do not address the curvature of the body. They are insufficient.

Ring adheres to body's curvatures

- **COLOR-CODED BARS**

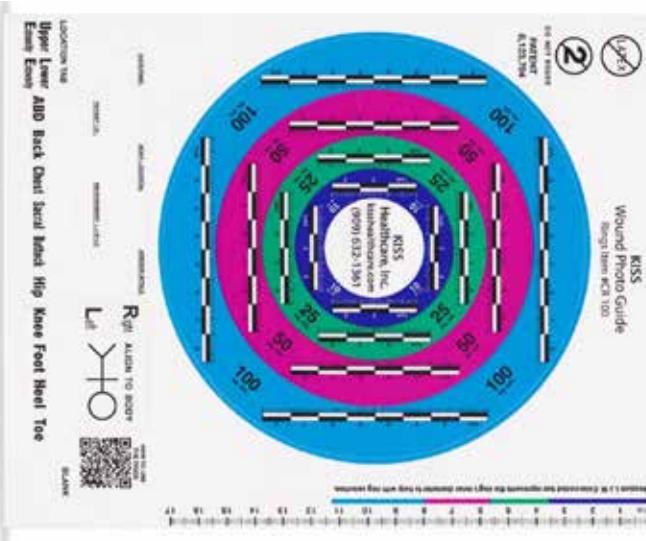

The ruler and scales are in the same plane as the wound. The bars help to highlight the contours of the body. Take a quality photograph without juggling the camera and the scale. If the camera is slightly out of focus and the numbers are not visible in the picture, the color-coded bars are still visible scaling the wound.

OKISSsystem™
KEEPING IT SIMPLE

WOUND PHOTO SCALES

The KISS System rings include 4 linear scales, an area scale, a perimeter scale and a note label. The 360-degree color-coded scaling system conforms to the curvatures of the body and helps address problems concerning camera positioning by keeping the wound standardized in every photo.

RULERS

The KISS System wound ruler is an effective tool for measuring and scaling in wound photography. Each sheet comes with the ruler, note label and wound alignment stick figure. The adhesive backing conforms to the curvature of the body providing an accurate scale in the photograph. The rulers are perforated so the size of the ruler can be adjusted to the size of the wound. This gives greater flexibility at the bedside.

R25 WOUND PHOTO SCALES

SF16 WOUND ALIGNMENT STICK FIGURE

NOTE LABEL

WOUND MAPPING MARKER

Enhance wound documentation by keeping photographed wounds organized in the medical record.

BULLET HOLE SCALES

The KISS System scales bullet holes and ricochets to reconstruct the crime scene and create a professional presentation to the jury.

WOUND PHOTO SCALES

Each sheet is an all encompassing tool to aid with the photo documentation of a patients wounds.

LEATHERMAN, U.S. TAPE & CST/BERGER

Featured products

Documentation

Documenting a crime scene accurately and precisely is just as crucial as gathering evidence. Professional grade products from Leatherman, U.S. Tape, and CST/Berger help law enforcement to document crime scenes with reliability and ease of use.

These 3 companies are leaders in their fields and have spent several years creating the highest quality products for professional users.

Meet the Brands

• LEATHERMAN

Since 1983, Leatherman has been making tools that can endure just about anything and come back to work tomorrow. Leatherman is a leader in do-it-all tools.

• CST/BERGER

CST/berger is the leading worldwide manufacturer of construction, surveying, equipment and supplies and offers more than 1,000 products of the highest quality.

• U.S. TAPE

U.S. Tape Company Inc. is a domestic tool manufacturer specializing in professional tape measures and other specialty tools for the professional user since 1876.

 **LEATHERMAN**

CST/berger
No One Measures Up... Worldwide

U.S. TAPE
WORLD CLASS TOOLS SINCE 1876

LEATHERMAN

Leatherman offers helpful and innovative tools such as the Expanse pocket knife, the Wave, and the Serac S3 LED flashlight designed to be efficient and reliable.

All Leatherman products are made from premium materials and utilize the latest technology available.

CST/BERGER

Measure with reliability and ease with the latest from CST/Berger.

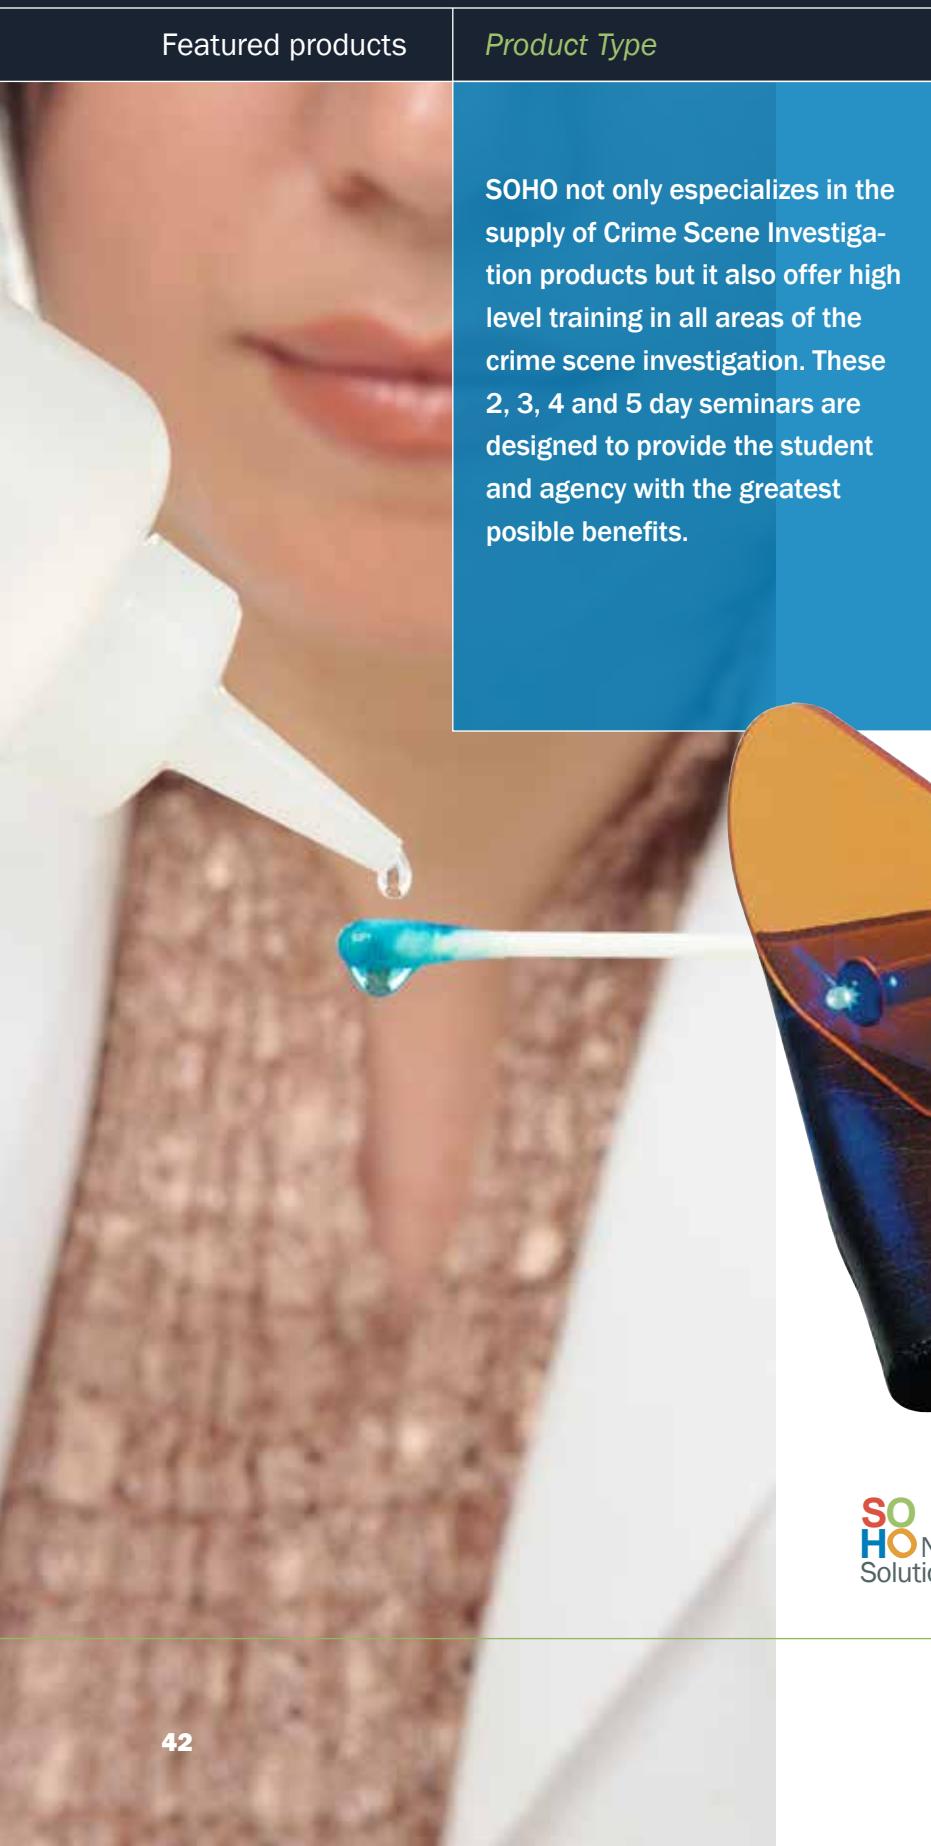

Products include the Laser Distance Measurer by Bosch, the MM-12 Twin Series measuring wheel, and the ProMarker 30 measuring and marking wheel from Rolatape.

US TAPE

US Tape is known for providing law enforcement with measuring tapes and tools such as ProTape construction grade short tapes, Contractor long tapes, and DuraWheel measuring wheels.

SOHO TRAINING

Featured products

Product Type

SOHO not only specializes in the supply of Crime Scene Investigation products but it also offer high level training in all areas of the crime scene investigation. These 2, 3, 4 and 5 day seminars are designed to provide the student and agency with the greatest possible benefits.

- **EDUCATION CREDIT**

Each course will enable students to learn the latest technologies and how to apply these to the field.

- **INSTRUCTORS**

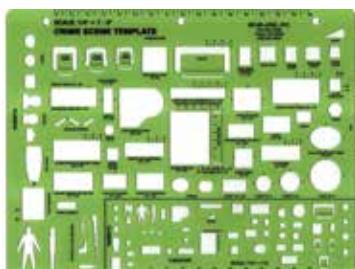

SOHO will continue to seek out the most qualified and highly sought after, forensic instructors available, in an effort to provide the criminal justice and forensic communities with a steady stream of relevant training opportunities that they so desperately need in today's ever changing scientific and legal environments.

**SO
HO** Network
Solutions Inc.

FUNDAMENTALS OF CRIME SCENE INVESTIGATION AND EVIDENCE COLLECTION

The purpose of this course is to give Law Enforcement personnel the skills needed to identify, process photograph, and preserve the crime scene and evidence found in them. The course provides a foundation for future development through experience and continued training. Upon completion, you should possess the fundamental skills to process crime scenes and collect physical evidence.

FORENSIC EXAMINATION OF VIOLENT CRIME SCENES

Crimes against persons are serious frequently results in serious bodily harm or death. This advanced course will present both the theory and practical application of several techniques that are essential to crime scene examination and reconstruction of violent crimes. Practical exercises and case studies will be utilized to reinforce the material presented.

FINDING LATENT EVIDENCE WITH CHEMISTRY AND LIGHT

The purpose of this 4 day seminar is to enable the student to: identify the best technique for developing the maximum evidence, understand and exploit fluorescence as a powerful detection strategy, using a range of Forensic Light Sources record impression evidence faithfully and accurately, and prepare and use the chemical reagents safely in a laboratory environment.

COLLECTION, DOCUMENTATION & PRESERVATION OF IMPRESSION EVIDENCE

After this course the student will be able to locate, document, collect and properly preserve valuable impression evidence. Through HANDS-ON exercises, the student will gain a working knowledge of proper photographic documentation techniques required to preserve the impression evidence for future comparison and identification.

ORDER INFORMATION

Orders, Shipping, Warranties, etc.

Phone: 904.236.6020 Fax: 866.244.4521
www.sohoteam.com

9655 Florida Mining Blvd., W, Suite 309
Jacksonville, FL 32257

PRODUCT INFORMATION

To request more information on products—displayed or not displayed in this catalog—vendors, and more, contact SOHO Network Solutions Inc. online 24/7 at www.sohoteam.com or by phone Monday through Friday from 9am to 5pm EST.

PLACING AN ORDER

Orders can be faxed in 24 hours a day, or emailed to our sales department at info@sohoteam.com. To phone in your order call (904) 236-6020. Our customer service department is open 9:00 am to 5:00 pm Monday through Friday EST.

A distributor may, as a matter of administrative convenience only, use its usual form of purchase order when ordering products from SOHO, however, that any pre-printed terms or conditions shall have no effect and SOHO hereby expressly rejects all such distributor purchase order terms.

INTERNATIONAL ORDERS

SOHO is proud to supply high quality forensic products to most countries around the world, however some products we sell are controlled by the U.S. Department of Commerce and can not be exported from the United States without specific approval (Part 750, U.S. Export Administration Regulations) and/or the Department of State (22CFR 120-130, ITAR). It is the exporter of record's (individual subject to the jurisdiction of the United States) responsibility to obtain the license.

SOHO will apply for any requested export licenses for orders which ship from our facility to international destinations, but you must provide us with the full name, address, contract person and telephone number of the in-country end user so that we may apply for the license in anticipation of the order. Please note that the issuance of a license can take from 30–60 days and that the license is intended for resale only within the country of destination. Re-exporting, or reselling into additional countries is not permitted without prior U. S. Government Authorization. Diversion contrary to United States law is strictly prohibited.

SHIPPING

Shipping time and cost is largely dependant on the destination, products ordered, etc. Therefore shipping and handling quotes will be given on a case by case basis.

HAZARDOUS GOODS

Certain products are classified as hazardous goods and are subject to a hazardous material surcharge. SOHO ships hazardous goods in compliance with the Hazardous Materials Regulations set forth in either Title 49 of the IS Code of Federal Regulations (49CFR) or the International Air Transport Association (IATA).

PRICING

SOHO accepts orders from forensic professionals through the world. We accept Visa, Master Card and Amex as well as electronic funds transfer (EFT). International accounts are required to prepay by Bank Wire Transfer or irrevocable letter of credit advice and confirmed by a major United States bank payable in US Dollars at sight upon standard proof of shipment. All banking charges, including those of the negotiating and paying banks, documentation, legalization and/or authentications charges are to be paid by the purchaser.

WARRANTIES

All merchandise sold by SOHO is covered by various manufacturer's warranties. Merchandise once sold by the distributor becomes subject to the specific manufacturer's warranty and is not the responsibility of the distributor or SOHO. All warranty claims by end users must be submitted directly to the manufacturer.
